### TACC Workshop

#### **‘Scientific Data Repositories : Use Cases, Innovation, and Best Practices’**

ICSTI’s **Technical Activities Coordinating Committee (TACC)** typically focuses on exploring and communicating technical aspects of innovative trends in information science-based tools that help make STI more useable and accessible. The **Chair of TACC is Brian Hitson**, Director US DOE/Office of Scientific and Technical Information (DOE/OSTI).

#### Workshop Description

Research funding in recent years often comes with the condition to make some of the resulting data openly available. Scientific data can be made available through a number of mechanisms, including being hosted in general scientific data repositories. This workshop will explore various data repositories and data discovery tools, their plans for long term preservation and access to the data they host, provenance and updating/versioning of data, and cross-repository integration and search.

#### Workshop Program                      *Status 18 January 2017*

##### **They confirmed their participation**

- ▶ Amir Aryani, ANDS: *Research Data Switchboard*
- ▶ Ingrid Dillo & Peter Doorn, DANS
- ▶ Angelina Kraft, TIB: Paper presenting the project RADAR
- ▶ William Michener, DataONE: *DataONE: Supporting Data Discovery, Sharing and Reproducibility to Enable New Science*
- ▶ Tim Smith, CERN: Paper presenting Zenodo
- ▶ Dan Valen, fighshare: *Active Research Data Management Workflows through to Preservation*
