

Welcoming the Agricultural Information Institute (AII) of the Chinese Academy of Agricultural Sciences (CAAS)

Established in 1957, [AII](#) is a national research institution, with the mission to advance scientific innovation in the field of agricultural information and to provide agricultural information services nationwide. AII has over 20 divisions mainly focusing on the research of agricultural information analysis, agricultural information technology and agricultural information management. AII is the center of national agricultural science data, the center of national agricultural information technology innovation and also the center of national agricultural information analysis and early-warning. It is responsible for the running of the **National Agricultural Library (NAL)** (<http://www.nais.net.cn>), which is one of the four arms of the **Chinese National Science and Technology Library (NSTL)** system. AII has already established cooperation networks with more than 40 foreign institutions and international organizations, such as FAO, WFP, IFAD, CABI, ADB, International Food Policy Research Institute, Economic Research Service of USDA, and Wageningen University of Netherlands.

The Agricultural Information Institute (AII) of the Chinese Academy of Agricultural Sciences (CAAS) joined ICSTI as a Class B1 Full Member on 14th March 2017.
